## EuropeanIssuers Capital Markets Webinar Series: Digitalisation of EU Capital Markets

## EuropeanIssuers Capital Markets Webinar Series

## Digitalisation of EU Capital Markets

17 November 2020

11.00 – 12.15

## Agenda

European economic recovery post-covid in many ways depends on reviewing its capital markets. Europe has to discover ways to make public equity and debt financing more attractive for SMEs and, generally, reduce the entry barriers for accessing capital markets. The solutions to today's challenges faced by listed companies pass by technology and digitalisation of capital markets. In line with this, the Capital Markets Union High Level Forum Final Report sets out recommendations for moving the EU capital markets forward and highlights what capital markets need in terms of technology and digitalisation. This webinar discusses what digitalisation of capital markets implies for issuers, what they need to do to adapt, how they fit into the ecosystem and what policy makers have been doing to drive digitalisation forward.

11.00 – 11.05 Opening remarks by the moderator

**Robert Koller**, Executive Chairman of the Board, european primary placement facility (eppf) S.A. & Member of EuropeanIssuers

11.05 – 11.15 Digitalisation and automation of listings and compliance
